

5 OPTIONS WHEN YOUR PARTS AREN'T AVAILABLE

WAIT FOR IT

You can wait the lead times from your authorized distributor. However, often production schedules won't allow for that.

FIND A CROSS REFERENCE PART

You can try and spec in an alternative component that fits the existing footprint and design.

POTENTIALLY REDESIGN

On obsolete parts, especially, you may be looking at a potential redesign, which is not only costly but extends your production time.

OPEN MARKET

You can go to the open market. Your risk for counterfeits, especially on obsolete parts, increases when sourcing from the secondary market

CONNECTED DISTRIBUTION THROUGH CONVERGE

You can partner with Converge, your reliable and trusted independent and connected distributor. Beyond finding the parts you need, we fully optimize your supply chain through market and data intelligence. Converge is the only connected distributor with a unique combination of global access, industry expertise, and proven quality that can respond to urgent needs and dynamic market conditions, and the financial backing to provide terms that empower long-term growth.
